Guide Before Use

FL-01

Quick Start Guide

poolease

1 Product Structure Diagram

- 1 Filter Basket
- 2 LED Light
- 3 Handle
- 4 Roller Brush
- 5 Float Socket
- 6 Charging Port
- 7 Power Switch

2 Lighting Effects

Solid green light		Battery level above 20%
Solid red light		Battery level below 20%
Solid blue light		Turbo mode
Off		Device powered off

Tips

- The indicator light remains off while the robot is charging in the powered-off state.
- During charging, the adapter indicator shows **red** when charging and **green** when fully charged.

3 App Pairing

APP Download

Download the app and create an account by searching for "SmartLife" in the App Store or Google Play.

Activate robot's Hotspot

Press and hold the button on the right side of the float. When the indicator light on the float changes from solid red (wait a few seconds after the robot is powered on) to flashing red, the robot can be configured for network settings.

Pairing the robot

Make sure your phone's Bluetooth is turned on, open the SmartLife app to complete pairing.

Tips

- Make sure the robot is turned on.
- Confirm that both your mobile phone and the robot are on the same strong Wi-Fi network and within 1 meter of each other (supporting only the 2.4GHz network).
- Ensure that the float is properly installed (refer to the user manual for installation steps).

4 Remote Control Pairing

5 Using

Place the robot in the water and wait for it to start. Default mode: Automatic Cleaning.

APP Operation

Remote Control Operation

Tips

- Briefly press a directional control and the robot will continue moving in the selected direction.
- If the "Upper Wall" or "UP" command fails, the robot will return to the pool floor and may require about 1 minute to self-calibrate before accepting the next command.

6 Precautions

- Before cleaning, please make sure there are no foreign objects such as towels or toys in the pool.
- Avoid animals and people from entering the pool during operation.
- For optimal cleaning results, it's recommended to operate the robot separately from the circulation pump.
- It's not suitable for cleaning pool steps.
- It's not suitable for cleaning pool walls made of soft or flexible materials.
- If this is the first use of the season, remove large debris manually before using the robot. This helps maintain performance and prevents the filter from clogging.
